

MARINE Product Guide

Who We Are

Pine River Group is a proud part of Biewer Lumber, LLC - a family owned and operated company for more than 50 years. With access to our own sawmills, treating facilities and many business partnerships, our strategic position grants us the power and flexibility to serve our customers in unique and diverse ways across the country; continuously growing and adapting to market demands.

Our Mission

Supply our customers with a carefully selected collection of the best products the industry has to offer, at fair market pricing, with an acute attention to detail and customer care.

Our Commitment

We understand the urgency and importance of having information and material when you need it and are committed to doing what it takes to accommodate. Offering quality products, quick quote turnarounds and multiple delivery options when needed.

Connect With Us

We look forward to connecting and the opportunity to work together. Please don't hesitate to reach out, we're more than happy to help.

WOOD DOCK PLANKING

Pier Advantage Wood Dock Planking, exclusively designed for waterfront applications, is a natural and environmentally-friendly solution for docks, piers and boardwalks. Made from the highest grade (C & better), dimensionally stable Southern Yellow Pine, every board is hand-selected for quality and appearance. You'll find Pier Advantage to be straighter, with less wane than competitive marine dock planking. Additionally these planks are engineered with eased edges and stress relief grooves for the finest look and performance available. Treated to maximize longevity, build a stable and secure dock with Pier Advantage Wood Dock Planking.

Benefits

- ✓ Top quality, appearance grade lumber
- ✓ Radius edge profile
- ✓ Stress relief grooves
- ✓ "Bark-side-up" orientation
- ✓ Appearance grade (C & better)

"Pier Advantage wood is the best decking lumber I have ever used, nothing comes close to the quality."

- Steve Fiscelli, Fiscelli Marine Construction -

MoistureShield™
COMPOSITE DECKING

COMPOSITE DOCK PLANKING

Pier Advantage Composite Dock Planking, manufactured by MoistureShield®, is the professional's choice for waterfront applications. With MoistureShield's total fiber encapsulation process, each board is protected against rot, decay and termite damage. Pier Advantage is available in a wide range of colors to suit all preferences.

Together with MoistureShield we work with each client to customize and form the best warranty possible. Find security with coverage up to a limited lifetime warranty as well as working with a product that has had zero product failure claims due to delamination, decay or rot.

Benefits

- ✓ 95% recycled product - qualifies for LEED points
- ✓ Resistance to moisture, mold, mildew, and staining
- ✓ Use above, on or in contact with the ground or water
- ✓ Series & color selection to fit budget & style

AVAILABLE WITH
**COOLDECK
TECHNOLOGY**

- ✓ Reduces heat absorption up to 35% compared to conventional capped composites
- ✓ Decreases heat transfer on contact
- ✓ Available in Vision & Vantage Series

COMPOSITE PILING & STRUCTURAL LUMBER

When you need a combination of strength, durability, and aesthetics, there's no alternative to Tangent materials. Our materials are the proven long-lasting structural solution that provide long-term strength and durability and outperform traditional structural materials. Our structural material resists water, mildew, moisture, and chemicals.

Tangent's Marine Piling & Timber products are advanced composite plastics, engineered for the marine industry. Manufactured from recycled HDPE and fiberglass strand and rod, this product is ideal for heavy-duty applications in the marine industry.

Benefits

- ✓ **EXCEPTIONAL STRENGTH**
The most durable, impact-resistant materials available.
- ✓ **ENGINEERED SOLUTIONS**
Tailored products that deliver on customer needs.
- ✓ **ENVIRONMENTALLY FRIENDLY**
Made from recycled materials and won't leach toxins.

TREATED WOOD PILING

With the largest inventoried supply of piling in the Midwest we have driven our position as the go-to source for marinas, pile drivers, contractors and municipalities. Available for both marine and foundation applications. We offer a wide variety of sizes, species and preservatives; priding ourselves on the ability to meet the requirements of any job.

Our stocked lengths range from 20' to 50' in 5' increments. Additional special ordered solutions are available for needs beyond that range.

Benefits

- ✓ Strong and stable - can withstand forceful water currents
- ✓ Pressure treated to maximize life expectancy and mitigate rot, decay and damage from other natural organisms
- ✓ Kiln dried prior to treatment for maximum chemical penetration and retention
- ✓ Economical choice for dock construction

"From the top to the bottom Pine River Group is first class. We've worked with them for over 30 years and think of them as family. If we need something, they've got it and if they don't they'll go out of their way to get it for us."

-Todd Crawford, J.T. Crawford Construction -

TIMBER, LUMBER & FENDERING

We understand that supporting your deck, dock or structure is crucial to building with confidence. Our treated timbers, lumber and fendering give peace of mind that from bottom to top, you've built something with incredible structural integrity. With over 50 years in the wood foresting, milling and treating industry we know what quality looks like and only aim to deliver the best.

Marine properties, whether residential or commercial, are naturally exposed to some of the harshest weather conditions and as such material selection for construction jobs matters. Let us help you with our quality selection of Red Pine and Southern Yellow Pine treated products for your next project.

"My two favorite things about working with Pine River Group are the pricing and correspondence. We have a lot of odd specs come across our desks and they are always a really reliable lumber supplier."

- John Jocham, L.J. Construction -
